

# Riser card PCI Express x16 DUO angled 90° left insertion

## Description

In many computer cases with low height, like 48.3 cm (19 inch) rack mount cases with one or two height unit, it is often not possible to vertically install an interface card. The Delock Duo riser card with its flexible cables allows you a space-saving horizontal installation of two PCI Express x16 cards. The space between the two slots can be changed if necessary.
