

Delock DisplayPort 1.2 KVM Switch 4K 60 Hz with USB 3.0 and Audio

Description

This KVM switch by Delock is a convenient solution for connecting two computers with DisplayPort output to a DisplayPort monitor. By using the button or a hotkey you can switch between both computers. Furthermore, two USB 2.0 ports for a mouse and keyboard, and two USB 3.0 ports for a hard drive or USB memory can be connected. With the support of MST (Multi-Stream Transport), multiple monitors can be used at the DisplayPort output with an optional MST hub.

Note

MST (Multi-Stream Transport) requires either monitors that are capable of DisplayPort 1.2 daisy-chaining, or use of a powered DisplayPort MST Hub. The PC source must be DisplayPort 1.2 MST compliant.
