Delock Shield Clamp for DIN Rail - Cable diameter 10 - 20 mm

Description

With this shield clamp by Delock a cable with a diameter of 10 - 20 mm can be attached to a 35 mm DIN rail. The clamp can also be used as an EMC shield. In this case, unwanted electrical or electromagnetic effects are dissipated from the DIN rail.

Application

To fasten a cable to the clamp, the spring must be pressed down with a tool, e.g. a screwdriver. If a cable is attached to the clamp, the best way to detach it is to press the spring down with the cable. The shield clamp can also be screwed to the DIN rail, for which an Allen key size HX3 is required.

Item no. 66442

EAN: 4043619664429

Country of origin: Germany

Package: Zip poly bag

Specification

- DIN rail mounting: 35 mm
- Cable diameter:
  min.: 10 mm
  max.: 20 mm
- Material: metal
- Dimensions (LxWxH): ca. 40 x 26 x 24 mm

System requirements

- 35 mm DIN rail

Package content

- Shield clamp
