Description

This USB cable by Delock enables the connection between a device with a USB Type-C™ connector and a PC or a laptop equipped with a free USB Type-C™ port.

Active Optical Cable

This active optical cable uses optical fiber to transmit high-speed signals. Compared to traditional copper cable, it is softer, thinner, lighter, and can transmit signals over longer distances without loss.

DisplayPort 1.4 with 2 lanes

The cable is suitable for connecting a USB-C™ monitor with resolution up to 4K Ultra HD (3840 x 2160 @ 144 Hz) to a computer with USB-C™ interface and DisplayPort Alternate Mode support.

USB with 10 Gbps

The active optical cable enables data transfer rates of up to 10 Gbps when connecting USB 10 Gbps compatible devices. Of course, USB 2.0 devices can also be connected.

USB Power Delivery support up to 60 watt

Supporting the USB Power Delivery standard, connected devices can be powered up to 60 W (20 V / 3 A).

Note

This cable is only compatible with DisplayPort (DP alt mode) devices and it will not work with Thunderbolt™ devices.
