

Delock PCI Express AV Capture Card with HD-SDI

Description

This AV capture card by Delock can be used to transfer video signals, for example from a digital camera or a DVD player, to your PC and record them. You can capture your movies in HD quality with the included Stream Catcher software. With the multiple connectivity options all common analog and digital sources can be used. As a special feature the card has an HD-SDI input to record videos from professional cameras or HD-SDI CCTV cameras in high-definition.

Item no. 89364
